

SENSOR: increased relaxation and creativity thanks to cushioned tip

Eight colors, new design, cushioned tip: more than ever before, the SENSOR makes writing a colorful pleasure!

The classic STABILO SENSOR is a winner thanks to its characteristically sensitive and cushioned tip, and now comes in a new outfit! The fineliner uses micro-cushioning to adapt to the writing pressure, giving you a relaxed feeling in your hand, even after longer periods of writing, and allowing you to enjoy excellent writing comfort. The STABILO SENSOR stands out thanks to its modern, minimalist design and eight vivid colors.

The SENSOR's name comes from the way it reacts to how you use it: its gentle cushioning protects the tip from bending and breaking, which has an extremely positive effect on its durability. No matter how hard you press, the SENSOR adapts itself and balances this out. Another decisive advantage of the pen is the even and extremely precise lines, with a width of 0.3 mm. This makes it an ideal writing instrument for ColorTangle – a meditative coloring trend for relaxing with bright colors which has become successful among amateur artists worldwide, regardless of their profession, age or interests.

A SENSOR for creativity

ColorTangle means leaving everyday life behind you and immersing yourself in a world of colors. Designing colorful mandalas, giving structured patterns more color or drawing imaginative lettering: a great way to unleash your creative energy! Coloring for relaxation, concentration and well-being: STABILO has two special ColorTangle sets on offer – in addition to the regular packs.
